

TRI-METAL XR Extra Response Irons

Want extra forgiveness, extra power and extra control? Look no further than Orlimar's Tri-Metal XR (Extra Response) irons. With multi-metal construction, these classically shaped irons locate weight inserts where they will help the most; lower and deeper in the club head. The result is a high M.O.I. iron with a huge sweet spot and penetrating ball flight. Tungsten weighting in the heel and toe of the sole provide stability. Add it all up and you have a technologically advanced high-performance iron. Remember, XR means Extra Response.

- High-performance stainless head
- Aluminum cavity insert
- Tungsten sole weights
- Golf Pride® New Decade grips
- True Temper® steel shafts

Aluminum Cavity Insert

TriMetal Technology

17-4 Stainless Head

Tungsten Inserts

True Temper® Dynamic Gold Lite Steel Shafts

Golf Pride® New Decade Grip

Features & Benefits

- Precision Tungsten Weighting.** The Tri-Metal XR Iron set features dual Tungsten heel and toe weight inserts that distribute weight to the perimeter of the head. The result is a considerably enlarged sweet spot and extremely high M.O.I. for resistance to torque on off-center hits. Forgiveness is engineered into every shot.
- Aluminum Cavity Plate Provides Optimal Center-of-Gravity.** Lightweight Aluminum allows discretionary weight to be positioned in the sole to produce a lower and deeper center of gravity. Combined with the Tungsten inserts, these weight transfers provide optimal launch and spin for a penetrating ball flight.
- 17-4 Stainless Body.** This advanced iron shape uses high-chromium 17-4 stainless steel to produce a solid, strong, and tarnish-free body. The appealing profile of The Tri-Metal XR Irons enhance their performance; maximum launch with consistent spin and velocity.
- Improved Sound and Feel.** With a high M.O.I. and a very low CG, the Tri-Metal XR Irons provide a confidence-inspiring stability on impact. They also emit a pleasingly solid sound. These characteristics are a by-product of extremely high-grade metals combined with advanced product development. Great feel and sound mean one thing; performance.
- True Temper® Performance Matched Shafts.** The XR Iron Series takes advantage of True Temper's Dynamic Gold Lite Uniflex steel shafts for powerful flex response and superior torque-control. These ultra-lightweight shafts are the ideal choice for golfers looking for a mid-launch trajectory. True Temper has been the #1 shaft on Tour for over 70 years.
- Golf Pride® New Decade Rubber Grip.** With a new look and feel, these grips utilize an innovative composite rubber formula for all-weather control. Made especially for Orlimar, these all-black grips have the Orlimar logo on the cap-side and lower-hand area. With the dominant grip on the PGA Tour, Golf Pride remains the right choice for performance.
