

TRI-METAL ZX Zone Extension Fairway Wood

The Tri-Metal ZX Fairway Woods use three high-performance metals and fade-fighting design to produce an exceedingly easy-to-hit club. A precisely placed tungsten weight and a 2° closed face alignment assist with square contact, while a lower center of gravity and a super-strong maraging face produce a powerful high-launch trajectory. Add a powerful 17-4 Stainless head, and the end result is long-range accuracy and lower scores.

- High-performance stainless body
- Impact-reactive maraging face
- Draw Tungsten sole weight
- Golf Pride® New decade grips
- Powered by Aldila® graphite shafts
- Matching head cover

Orlimar® Pro Series Aldila® Graphite Shaft

Head Cover

Golf Pride® New Decade Grip

Features & Benefits

- **Optimal Loft Choices.** Offered in #3 15° and #5 19°lofts. Complete your set with a confidence-building, easy-hitting Fairway Wood from Orlimar.
- **Closed Face for Fade Control.** A 2° closed face helps promotes a draw bias. This precisely engineered face alignment allows you to square up at impact. Flush, solid contact means straighter, longer shot making.
- **Stainless Maraging Steel Face for Superior Performance.** 13% lighter than stainless steel, maraging steel is extremely tough and light. The weight that is saved on the face can be relocated to the sole, aiding both trajectory and forgiveness.
- **Tungsten Sole Weight for Improved Launch.** Tungsten is 2.5 times heavier than stainless steel. Orlimar positions this concentrated mass low and in the heel to create a draw bias effect. The insert helps you get down and through the ball while producing a higher launch angle and lower spin. Combined with the latest ball technology, these attributes produce a longer, more penetrating ball flight.
- **Super Strong 17-4 Stainless Body.** Tri-Metal ZX Fairway Wood bodies are comprised of 17-4 stainless, which produces a stable feel and solid sound on impact. The high chromium content gives these clubs an excellent finish.
- **Pro Series Aldila® 60 Low-torque Shaft.** Tri-Metal ZX Fairway Woods are powered by the Aldila 60 Pro Series low-torque shaft. These shafts are performance-matched to the head's unique properties. The shaft's torque, or resistance to twisting on the downswing, is optimized to withstand centrifugal swing forces. This provides the golfer with the accuracy of square impact while still allowing the shaft's flex-response to impart maximum force through impact. There are more Aldila hybrid shafts in play on the PGA and Nationwide Tours than any other manufacturer's shafts.
- **Golf Pride® New Decade Rubber Grip.** With a new look and feel, these grips utilize an innovative composite rubber formula for all weather control. Made especially for Orlimar, these all black grips have the Orlimar logo on the cap-side and lower-hand area. With the dominant grip on the PGA Tour, Golf Pride remains the right choice for performance.
